The University at Albany is located in the capital of New York State and is an epicenter for government and politics. Internship opportunities are plentiful, and provide our students with the practical skills needed for a successful career. The region is home to a thriving high-tech industry, where many of our students take advantage of Optional Practical Training (OPT), allowing them to work in the US for three years after graduation, provided their degree is in a STEM designated field.

As one of only 146 Research 1 universities in the United States, our students learn from leaders in their fields, and are able to pursue cutting-edge research opportunities.
