Corrections to "A survey of random random walks on finite groups" *Probab. Surveys* **2 (2005), 33-63**

On p. 44, in the display just below the line with "Let's deal with the case $k = 2$ now", $\hat{P}_{a_1,a_2}(j)$ should be $|\hat{P}_{a_1,a_2}(j)|^2$.

Thanks to Joseph McCollum for his help in finding this point.
