Errors in *J. Alg. Comb.* **1**, 133-150.
Martin Hildebrand

When referring to irreducible representations $\boldsymbol{\lambda}$, Θ should be used instead of Φ.

In equation (2.5), γ should be replaced by δ.

On the bottom of p. 145, $d^2_{\boldsymbol{\lambda}}$ should be replaced with $d^2_{\tilde{\boldsymbol{\lambda}}}$.

On p. 147 at the end of the line after "By Lemma 5.4, we conclude", the term $\alpha_n^{2(n+c)}$ should be replaced by $(\alpha_n/q^i)^{2(n+c)}$.

On p. 136, there are two displays where $\boldsymbol{\mu}$ equals something if $f = f_1$ and 0 otherwise; in both cases $\boldsymbol{\mu}$ should be replaced by $\boldsymbol{\mu}(f)$.

The author regrets these errors. However, these errors do not affect the results of the paper.
